# Oda Schneider

**Front-End Developer**  
(Angular)

---

## About Me

---

I am a Web Developer with experience in building web apps with JavaScript, TypeScript & Angular. I started my professional journey in biotechnology. After I finished my master's degree, I became a mother and that brought many changes in my life, such as the desire to reorient myself professionally. Since I liked the structural and solution-oriented thinking process, I decided to deepen my skills in programming and started at a professional software development school (Developer Akademie in Munich). Currently I work as a Software Engineer at adesso-insurance-solutions and contribute to building a component library used in the company's product offerings.

### Main Stack:

- HTML, CSS/SCSS, JavaScript, TypeScript, Angular
- RxJS
- Jest
- Playwright, Cypress

### Side Stack:

- Git, APIs (REST), Scrum, Kanban

---

## Skills

- 
- **Building Applications with JavaScript & Angular:** I built several single-page web apps as well as OOP-based Jump-and-Run-Games with the respective technologies. I also created a design system for the component library in my current role.
  - **Building Angular Components:** I specialize in building reusable and modular components, complemented by thorough testing and documentation practices.
  - **High sense of responsibility:** Given our work's pivotal role in supporting all products, there's a strong sense of responsibility to deliver a solid foundation for seamless operation.
  - **Ability to work problem-oriented:** In my current role, the key skills involved in building a library are understanding requirements, ensuring compatibility, optimizing performance, and proficiently handling debugging tasks.

---

## Professional Experience

---

### adesso-insurance-solutions / Software-Engineer

Jan 2023 - Today

Creating a component library. Main Stack: TypeScript, Angular, Jest, RxJS

Component design, scalability, reusability, and modularity, testing (Jest, Playwright) and documentation, reactive programming with RxJS.

Creating a design system for components.

Building a web application, understanding of user interface and user experience principles, communication skills to collaborate with designers, ability to plan, organize, and prioritize tasks effectively to meet deadlines.

---

## Education

---

### Developer Akademie / JavaScript & Angular Web Development Training

Apr 2022 - Nov 2022, Munich

Project based coding academy. Main Stack: JavaScript, Angular

Extensive Coding School, Learning Front-End Development, Coding, Agile Project Management and building several projects in teams and alone.

Take a look at my [Portfolio](#)

### Ernst-Abbe-Hochschule / M.Sc. Pharma-Biotechnology

Oct 2016 - Sep 2019, Jena

Biotechnology based drug development.

Enzyme Technology, Low Molecular Pharmaceuticals, Molecular Medicine, Recombinant Products, Genetic / Protein Engineering.

### Ernst-Abbe-Hochschule / B.Eng. Biotechnology

Sep 2013 - Sep 2016, Jena

Use of biomolecules, cells and whole organisms in technical applications.

Informatics (Python), Biotechnological Facilities, Laboratory Analysis, Biosensors, Biomaterials, Technical Microbiology.
